PROFESSIONAL SUMMARY

I am an expert web developer with over 15 years of experience building high quality and performant websites following mobile-first, component-based design and agile development methodologies. I have experience with Full Stack web development, CRM setup and migration, Data Engineering and eCommerce. I have a certification from Acquia for Drupal development, and my work on City of Hope has won an award. I've worked with teams of various sizes in various roles, all the way up to team lead. I am fully set up to work remotely but am willing to relocate if necessary. I'm looking for an opportunities to lead web development teams, use emerging technologies like AI, and spec into data engineering

EXPERIENCE

Technology Specialist, VML (via TekSystems)   November, 2021 - Present

- Lead the team tha build https://www.cityofhope.org, winning the 2022 eHealthcare Alliance Platinum award for Best Site Design for a Hospital with 200-399 Beds.
- Lead the development team that launched a redesign of Lutron's luxury website with new components, a Content Hub, and an Image gallery to showcase projects and designers that utilize their products. (https://luxury.lutron.com)
- Developed an ETL pipeline DAG using Google Cloud Composer to facilitate the migration of CRM data from Salesforce to Braze for Wendy's.
- Rebuilt the MyFembree website for Pfizer with a fresh mobile-first design and improved sitemap to help patients find information about how MyFembree can treat their symptoms and talk to their doctor about whether it is right for them.
- Developed updates to https://www.vml.com
- Developed updates to https://www.wendys.com

Senior Drupal Developer, NLRB (via Puyenpa)   May, 2020 – Nov 2021

- Senior Drupal Developer and Technical Architect for https://www.nlrb.gov
- Took over the project lead of a redesign and migration project that was 6 months behind schedule and saw the completion of the project on-time by the original deadline. Objectives included completing a migration from Drupal 7 to Drupal 8, completing a re-theme, completing implementation of single sign-on, and other features
- Solved DevOps problems that were plaguing the development process
- Maintained compliance of the website with the high security standards that all federal computer systems must adhere to.
- Solved website performance problems.
- Developed a series of Spanish language translated pages
- Developed website features to enable improved user experience for those seeking to download records from the large volume of case history that was made available through the site.
