PROFESSIONAL SUMMARY

I am an expert web developer with over 15 years of experience building high quality and performant websites following mobile-first, component-based design and agile development methodologies. I have experience with Full Stack web development, CRM setup and migration, Data Engineering and eCommerce. I have a certification from Acquia for Drupal development, and my work on City of Hope has won an award. I've worked with teams of various sizes in various roles, all the way up to team lead. I am fully set up to work remotely but am willing to relocate if necessary. I'm looking for an opportunities to lead web development teams, use emerging technologies like AI, and spec into data engineering

EXPERIENCE

Technology Specialist, VML (via TekSystems)   *11/2021 - Present*

- Managing a team that developed the Lutron Luxury V2 site https://luxury.lutron.com). Created a content hub of Case Studies by Designers Who use Lutron Products.Gathered requirements. Developed technical strategy/architecture. Build components with Acquia Site Studio. Managed dev and release CI/CD with Bitbucket and Jenkins. Managed site configuration.
- Lead the team that built https://www.cityofhope.org. Won the 2022 eHealthcare Alliance Platinum award for Best Site Design for a Hospital with 200-399 Beds.Gathered requirements. Developed technical strategy/architecture. Managed SDLC with CI/CD from Microsoft Azure DevOps to Acquia.
- Architected and executed content migration to Drupal 8 from Oracle WebCenter Sites. Configured Apache Solr search with Facets and custom plugins. Developed Ratings/Reviews component with data from Binary Fountain REST API.
- Developed an ETL pipeline DAG in Python using Google Cloud Composer to facilitate the migration of CRM from Salesforce to Braze for Wendy's.
- Rebuilt the MyFembree website for Pfizer using ReactJS (Gatsby) with a fresh mobile-first component-based design and improved sitemap. Developed CI/CD Pipelines in Bitbucket to deploy the site to an AWS server hosting environment.
- Developed updates to https://www.vml.com. Migrated content from another Drupal 8 site to merge the sites. Executed a full rebrand of the site from VMLY&R to VML using search/replace queries and scripts. Implemented design refresh. Migrated code repository from Bitbucket to Github. Set up Github Actions to use ESLint, PHPCS and Gulp to test and build the site in CI/CD pipeline.Configured Apache Solr Search.
- Upgraded https://www.wendys.com from Drupal 8 to Drupal 9. Fixed media and path alias bugs.

Senior Drupal Developer, NLRB (via Puyenpa)   *05/2020 to 11/2021*

- Senior Drupal Developer and Technical Architect for https://www.nlrb.gov
- Completed migration from Drupal 7 to Drupal 8
- Gathered Requirements

- Implemented Spanish Translations
- Implemented Apache Solr Search
- Architected and developed a download manager for large CSV exports.
- Set up improvements to Dev -> Stage -> Prod release lifecycle.
- Implemented Automated Testing using Katalon (a proprietary wrapper for Selenium) and Backstop JS.
- Configured Simple SAML single sign-on with Login.gov.
- Architected and developed a feature to allow users to follow cases and regional news on a dashboard.
- Maintained compliance of the website with the high security standards that all federal computer systems must adhere to.
- Solved website performance problems.
- Filed CAB requests and represented the Web team on CAB board to obtain approval for deployemetns.

Senior Drupal Developer, Duo Consulting   *01/2017 – 04/2020*
- Built the new website for Freeborn & Peters LLP. Migrated Drupal 7 to Drupal 8
- Built an online eCommerce point of sale for Chicago Botanic Garden with a Gateway/eGalaxy backend.
